PROJECTS

Resume Website —
To showcase some of my projects, I created a website that would be able to display my projects live. Created with React, Javascript, and CSS.

Note Keeper —
This Web application will let users store their notes online, this will store the information in the users cookies to be loaded up later. Created using React, Javascript, HTML, and CSS.

Dice Game —
This program will roll a dice for both players, generating a random outcome every time. The program generates a random number 1-6 and shows the corresponding dice image. Created using Javascript, HTML, and CSS.

Simon Game —
This brings back the classic Simon game ready for play, with the help of random numbers I and arrays, I could store a random sequence of numbers that will be checked against the user's input. Created using Javascript, HTML and CSS.
